DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 17-19, drawn to a radiation source and corresponding lithographic apparatus, classified in class 250, subclass 492.2.
 - II. Claims 10-11 and 20, drawn to a radiation source and corresponding lithographic apparatus, classified in class 250, subclass 492.22.
 - III. Claims 12-13 and 21-22, drawn to a radiation source and corresponding lithographic apparatus, classified in class 250, subclass 492.2+.
 - IV. Claims 14-15 and 23-24, drawn to a radiation source and a corresponding projection apparatus, classified in class 250, subclass 492.2+.
 - V. Claims 16 and 25, drawn to a radiation source and corresponding lithographic projection apparatus, classified in class 250, subclass 504R.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions have separate utilities such as creating a discharge in a vapor in a region between the anode and cathode, improving conversion efficiency, improving heat dissipation, preventing contamination from entering the lithographic projection apparatus, etc... See MPEP § 806.05(d).

Art Unit: 2851

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Henry V Nguyen whose telephone number is 571-272-2124. The examiner can normally be reached on Monday-Friday (First Friday off).
